

Confidence is good –
Pre-Inject is better!

The Accutron CT-D

is now also available with a Pre-Inject function

- (Testing of the patient's inflow prior to the injection!
- (Easy activation with a single keystroke!
- (Automatic profile adjustment!

**Be sure to
update now!**

The patient's inflow can now be tested prior to the actual injection! Furthermore, it is possible to analyze if the injection can be operated with the corresponding settings (feed rate taking the set maximum pressure into account)
